Chart Symbols & Abbreviations v.3 dated 01/09/11

Select the first AIP option

Scroll right down to section GEN 2 "Tables and Codes" then section 2.2 "Chart Symbols"

From the IAIP index on the left, select General Information - Index (at the top)

In the "2.2 Chart Symbols" section you will find a 5 page key to symbols used on both the airfield charts and those on the VFR 1:500,000 and 1:250,000 charts.

You will also find in the same section a complete list of all the **abbreviations** that we see every day

While in the "General Information – Index" have a good look through what else is there. It is a gold mine of useful information for Vatsim flying and controlling!
